

INTERIOR ARCHITECT + DESIGN

Design is not only about creating beautiful spaces, it's also about creating practical use of areas in the most economical manner while retaining a superior quality.

Tamara Zelinski-Grüngras

about

Tamara Zelinski-Grüngras is an interior architecture graduated from the prestigious University of Darmstadt close to Frankfurt but now based in Sydney's eastern suburbs,

Our work ranges from European classical and modern designs through to ultra modern and sophisticated interiors.

We yearn to explore and experiment with new design ideas, materials, furniture and lighting to provide clients with the most exclusive and original design packages which are strongly evident in the finished works and satisfied clients.

Initial roof garden concept design by TZG Interior Architect + Design

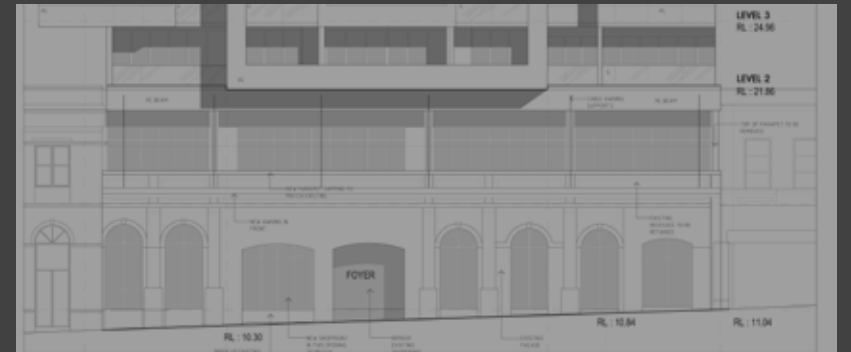

landscape/urban

TZG has a unique ability to make the most of your Urban Landscapes to tie them into the flow of the interior of the surrounding buildings. Working alongside renowned landscape architects, we will bring to life your precious areas.

Taking a lead from past European trends, we are injecting a new lease of life on city roof tops in Australia, bringing what was once dead space, alive.

heritage

Working with renowned international model builders, TZG is able to offer clients a broad range of model styles of the highest detail and quality. Each and every aspect of the model is personally overseen by Tamara including the final installation.

The difference between a good Interior Architect and a great one is how much they can save you without compromise!

The best time to use the services of an Interior Architect is before you buy a property. During your initial inspections of a property, Tamara will be able to assist you in pre-visualising any potential changes to the look and structure of the property to enhance the value of your feasibility study.

Whether you are renovating one room, an apartment, a house or even a full multi level building, Tamara will give you her undivided attention to create a master brief that will ultimately come to life.

Our creative ingenuity and 16 years of experience will not only deliver you style, quality and sophistication, and will also be completed on time and on budget. VALUE ENGINEERING in the design phase is what will help to keep the renovation costs on budget.
